Task 01

Read the following text and find the parts of the apartment

My Ideal Apartment

I think home is where one can find peace, joy, and most importantly where one can feel safe. I live in an apartment, which is located in Dhanmondi. We live on the 10th floor of the building. There are three bedrooms, three bathrooms, one dining room, one living room, and a kitchen. So it consists of eight different rooms, which is an ideal apartment for a family.

Our living room is quite big in size. My mother decorated and furnished our living room. There are many portraits on the walls. The floor of the living room is wooden. During the day, the living room is filled with light, as there is a really large window, so we don't need to turn on any lights.

The next room is our dining room. In this room we eat our breakfast, lunch and dinner. Sometimes our family meetings are held in this room. There is only one tiny window in it and there are many family photos. These family photos bring us sweet memories.

Our kitchen is quite large in size. There is one window and a balcony. The stove and the refrigerator are beside the sink. There is a chimney above the stove. This helps to reduce the emitted smoke during cooking. On the ceiling there is a fan which helps to keep the kitchen cool during hot seasons.

We have three bedrooms. All the bedrooms are moderate in size. There is a separate balcony for each room. The master bedroom is the biggest of all the bedrooms. My room is the smallest one, but it is filled with light. I love lighting very much so that's my favourite thing about my room. My mother has decorated all the rooms. Each room has a separate bathroom. All the bathrooms are spacious, and are well decorated too.

Task 02

Categorize the sentences from the above text into two categories: there is / there are

| | |
|--|--|
| There is + a/an + (person/place/thing/ animal) | There are + (number more than one)+ people/places/things/animals |
| There is a chimney | There are three bedrooms |
| | |
| | |
| | |
| | |
| | |
| | |
